

SUMIT SINGH

Machine Learning Enthusiast | Built & Deployed ML Projects
sumitsingh.connect@gmail.com | Faridabad, Haryana, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated BCA student with a strong interest in Machine Learning and Artificial Intelligence. Focused on building real-world projects and deploying practical applications. Passionate about solving problems using AI and continuously improving technical skills.

PROJECTS

Heart Disease Prediction App | [Live Demo](#)

- Built and deployed a Machine Learning web application using Streamlit.
- Implemented KNN algorithm with data preprocessing using StandardScaler.
- Designed an interactive UI for real-time prediction.
- Successfully deployed the application online using Streamlit Community Cloud.

Emotion Detection AI (Project Lucy)

- Built an emotion detection system using NLP techniques.
- Supports Hinglish and emoji-based emotion understanding.
- Implemented confidence-based fusion logic for improved prediction.
- Developed using TF-IDF and Logistic Regression.

AI Resume Analyzer | [Live Demo](#)

- Built and deployed a Resume Analyzer web app using Streamlit.
- Analyzes resume content and provides role-based scoring.
- Suggests best-fit roles and identifies missing skills.
- Includes basic ATS-style evaluation with visual insights.

Numiq – AI Math Solver | [Live Demo](#)

- Built an AI-powered math solving platform that combines symbolic mathematics and LLM-based reasoning.
- Implemented a multi-stage solving pipeline using SymPy, Groq, and Gemini for problem understanding, solving, verification, and step-by-step explanations.
- Supports equation solving, word-problem processing, and structured mathematical explanations with fallback handling for complex queries.

SKILLS

• Python • Machine Learning • Scikit-learn • Pandas • NumPy • Streamlit • Git & GitHub • NLP • FastAPI • SymPy

EDUCATION

Bachelor of Computer Applications (BCA)

MDU University | 2023 – Present

CURRENT FOCUS

- Strengthening Machine Learning fundamentals.
- Learning Deep Learning step-by-step.
- Building real-world AI projects.
