

SUMIT SINGH

Machine Learning & AI Developer | Built & Deployed ML Projects
sumitsingh.connect@gmail.com | Faridabad, Haryana, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated BCA student with a strong interest in Machine Learning and Artificial Intelligence. Focused on building real-world projects, deploying practical applications, and developing AI agents. Passionate about solving problems using AI and continuously improving technical skills.

EXPERIENCE

AI & Data Science Intern | XYlofy AI | Jun 2026 – Jul 2026

- Completed a 4-week internship gaining hands-on experience in Artificial Intelligence, Machine Learning, Data Analysis, and Data Visualization.
- Applied data-driven decision making to practical problems during the internship.

PROJECTS

Numiq – AI Math Solver | [Live Demo](#)

- Built an AI-powered math solving platform that combines symbolic mathematics and LLM-based reasoning.
- Implemented a multi-stage solving pipeline using SymPy, Groq, and Gemini for problem understanding, solving, verification, and step-by-step explanations.
- Supports equation solving, word-problem processing, and structured mathematical explanations with fallback handling for complex queries.

Retail Sales Forecasting Dashboard | [Live Demo](#) | [GitHub](#)

- Built an end-to-end retail sales forecasting system using Prophet, SARIMA, and XGBoost.
- Performed EDA, anomaly detection, and demand segmentation to generate business insights.
- Designed an interactive Streamlit dashboard for forecasting and analytics.

AI Resume Analyzer | [Live Demo](#)

- Built and deployed a Resume Analyzer web app using Streamlit.
- Analyzes resume content and provides role-based scoring.
- Suggests best-fit roles and identifies missing skills.
- Includes basic ATS-style evaluation with visual insights.

Emotion Detection AI (Project Lucy)

- Built an emotion detection system using NLP techniques.
- Supports Hinglish and emoji-based emotion understanding.
- Implemented confidence-based fusion logic for improved prediction.
- Developed using TF-IDF and Logistic Regression.

Heart Disease Prediction App | [Live Demo](#)

- Built and deployed a Machine Learning web application using Streamlit.
- Implemented KNN algorithm with data preprocessing using StandardScaler.
- Designed an interactive UI for real-time prediction.
- Successfully deployed the application online using Streamlit Community Cloud.

SKILLS

Python • Machine Learning • Scikit-learn • Pandas • NumPy • NLP • LangChain • LangGraph • FastAPI • Streamlit • SymPy • Git & GitHub

EDUCATION

Bachelor of Computer Applications (BCA)

MDU University | 2023 – Present

CURRENT FOCUS

- Building AI agents using LangChain and LangGraph.
- Strengthening Machine Learning fundamentals.
- Building real-world AI projects.
